

PlentyOfPersonality Study

A cross-section of the interests, hobbies and pastimes of singles across America

Helping shed light on the pursuits of singles across America, the PlenyOfPersonality Study has identified the top interests, hobbies and pastimes of singles in 11 major markets across the country, providing a better understanding of singles and their "types".

Using an interest-based algorithm developed by PlentyOfFish's Senior Data Scientist, the study examined over 10 million heterosexual singles over the age of 21 years old. To compile the data, the Research Team computed top interests appearing on users profiles into 20 personality archetypes, ranking each interest from high to low based on the frequency they appeared. The 20 archetypes are each comprised of a unique subset of interests and hobbies specific to the group.
